INTRODUCTION

This publication presents socio-economic statistics for Manitoba on a regional basis. The regions used in this report are the Official Regions for Data Collection (also known as Economic Regions) which are aggregations of the 23 census divisions as follows:

OFFICIAL REGION FOR DATA COLLECTION	ECONOMIC REGION	CENSUS DIVISIONS IN REGION
Southeast	60	1, 2, 12
South Central	61	3, 4
Southwest	62	5, 6, 7, 15
North Central	63	8, 9, 10
Winnipeg	64	11
Interlake	65	13, 14, 18
Parklands	66	16, 17, 20
North	67	19, 21, 22, 23

The data in this report was obtained from Manitoba Bureau of Statistics developed information, along with federal and provincial government sources. For some topics, the data was developed with the co-operation of both levels of government. For example, Income Distribution, Income Profiles and Economic Dependency Profiles (Sections 3, 4 and 5) were developed for the Manitoba Bureau of Statistics by the Administrative Data Development Division, Statistics Canada using Revenue Canada taxation data and the Manitoba Bureau of Statistics Postal Code Translator File. Unemployment Insurance Statistics (Section 6) was also developed by the Administrative Data Development Division, using Employment and Immigration Canada data and the Manitoba Bureau of Statistics Postal Code Translator File.

The report presents the regional statistical information by major subject matter areas (e.g., demography, income, employment). This information will be updated on a continuing basis as data becomes available. Data presented in the report is the most recent in MBS possession although more recent data may be available now or in the immediate future and can be produced on request.

Suggestions for additions to or deletions from this report would be most welcome.

To obtain additional regional information or to provide comments and suggestions, contact David Greenwood at 945-2989.

1.0 DEMOGRAPHY

This section illustrates demographic statistics for the 8 Official Regions for Data Collection.

Population estimates (Table 1.1) are presented as of June 1st each year during the period 1976 to 1989.

Deaths by age group for calender years 1987, 1988 and 1989, (Table 1.2) are based on the registrations received from the Office of Vital Statistics, Department of Family Services.

Population components for 1976-77 to 1988-89 are presented on a census year basis in Table 1.3.

Migration estimates in Table 1.3 have been developed from change of addresses on individual income tax records. Total migration is the total number of people moving to an area minus the total number leaving that area.

Life expectancy tables (Table 1.4) for Manitoba regions by sex were obtained from the abridged life tables, developed by the Manitoba Bureau of Statistics. Mortality data from 1985 to 1987 as reported to the Office of Vital Statistics, Department of Community Services was utilized in constructing the tables. The reference population was the 1986 Census figure adjusted to June 1, 1986.

The expectation of life or the average remaining years of life at any given age is the average (mean) number of years remaining to be lived by those surviving to that age group. Thus, according to Table 1.4, Southeast males in the 20 to 24 age group are expected to live an additional 56.4 years.

A more detailed description of the MBS Life Expectancy Tables can be found in the publication "Manitoba Regional Life Expectancies 1985-87", produced by the Manitoba Bureau of Statistics in August, 1988.

1.1 POPULATION (AS OF JUNE 1)

YEAR	SOUTH EAST	SOUTH CENTRAL	SOUTH WEST	NORTH CENTRAL	WINNIPEG	INTERLAKE	PARKLANDS	NORTH	MANITOBA
1976	63,100	46,900	108,800	44,500	560,900	62,700	54,100	80,700	1,021,500
1977	65,400	47,400	109,600	45,200	562,400	64,100	53,700	79,800	1,027,400
1978	67,000	47,800	109,600	45,500	564,100	65,600	53,800	78,700	1,032,000
1979	68,500	48,100	109,300	45,700	560,900	66,300	53,500	75,600	1,028,000
1980	68,600	48,600	108,000	45,400	561,300	66,100	52,800	74,200	1,024,900
1981	68,700	48,500	106,900	45,300	564,500	66,600	52,000	73,700	1,026,200
1982	69,000	48,700	106,800	45,200	570,900	67,200	52,000	73,500	1,033,300
1983	70,000	49,100	108,200	45,700	578,200	67,900	52,200	74,300	1,045,600
1984	70,900	49,300	108,700	46,000	583,600	68,900	52,000	75,800	1,055,100
1985	71,900	49,600	108,900	46,300	589,300	69,400	51,700	76,800	1,064,000
1986	73,000	49,900	108,900	46,100	594,500	70,300	50,600	78,000	1,071,200
1987	74,500	50,200	108,900	46,200	599,900	70,900	50,600	77,700	1,079,000
1988	75,700	50,300	108,400	47,300	602,900	71,400	50,600	77,300	1,084,100
1989	76,400	50,300	107,700	46,400	605,600	71,400	49,200	77,200	1,084,800
1990									1,089,900

NOTE: POPULATION ESTIMATES ARE AS OF JUNE 1. A CENSUS YEAR IS JUNE 1 TO MAY 31.
POPULATION ESTIMATES FOR 1976 TO 1986 ARE INTERCENSAL ESTIMATES
FOR 1987 AND 1988 REGIONAL ESTIMATES ARE COMPONENT METHOD
FOR 1989 REGIONAL ESTIMATES ARE REGRESSION METHOD
FOR 1987 TO 1990 MANITOBA ESTIMATES ARE POSTCENSAL

DATA SOURCE : MANITOBA BUREAU OF STATISTICS

2.0 DEMOGRAPHIC PROJECTIONS

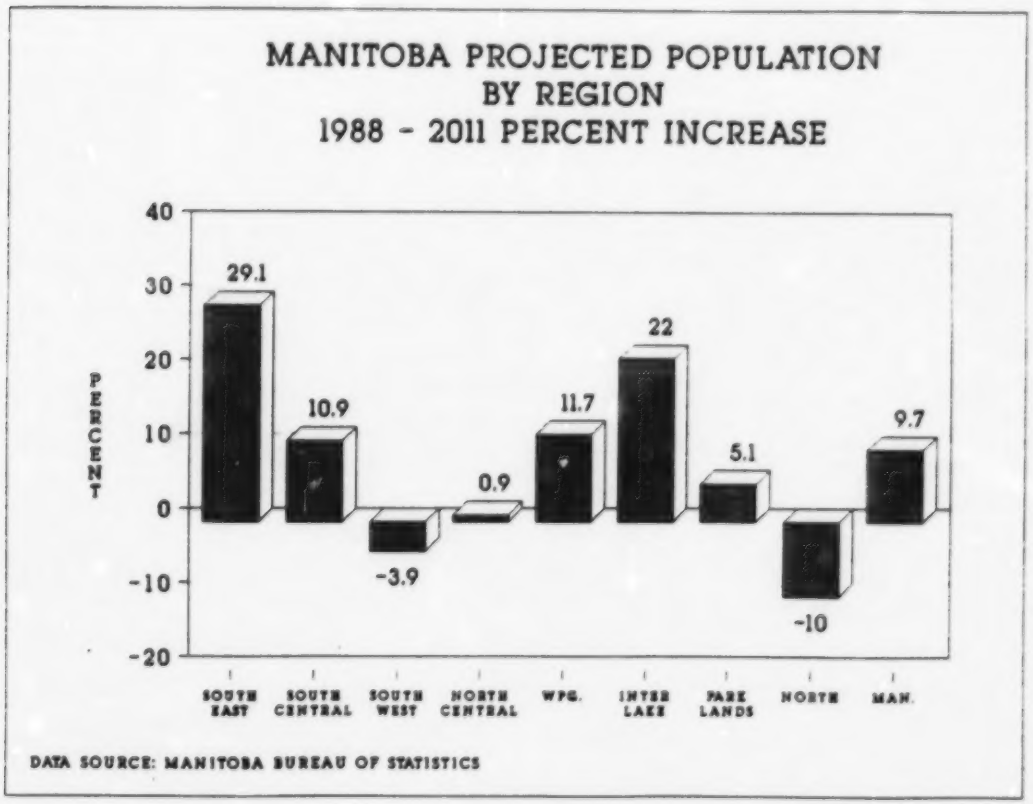
The Manitoba Bureau of Statistics has developed a set of demographic projections on a regional basis, for the years 1988 - 2011. The regional population projections (Table 2.1) have been developed in accordance with the Manitoba Bureau of Statistics Manitoba level series of population projections.

Birth projections (Table 2.2) have been developed by extrapolating regional fertility rates on a quinquennial basis from 1981 to 1996 (1996 rates were assumed to hold until 2011). These rates were adjusted to make the sum of projected regional births equal the number of births for Manitoba under the Manitoba level population projections.

Over the projected period, regional life expectancies at birth (the assumption for death projections) were increased by an amount equal to the increase in life expectancies for Manitoba.

The regional life expectancies were then adjusted until the sum of regional deaths (Table 2.3) equalled the number of projected deaths for Manitoba under the official series of population projections.

The regional total migration projections (Table 2.4) were derived by applying historic regional migration distributions to the Manitoba level projections.



POPULATION PROJECTIONS (BASED ON 1986 CENSUS)

CENSUS YEAR	SOUTH EAST	SOUTH CENTRAL	SOUTH WEST	NORTH CENTRAL	WINNIPEG	INTERLAKE	PARKLANDS	NORTH	MANITOBA

AS OF 1990 THE PROJECTIONS WERE 5,800 OVER THE MANITOBA ESTIMATE OF 1,089,900

DATA SOURCE: MANITOBA BUREAU OF STATISTICS

3.0 INCOME DISTRIBUTIONS

Income distributions have been developed from income tax records. The distribution for Total Income (as reported on an individual's income tax return) is presented in Table 3.1. The geographical coding of the tax data is based on mailing addresses.

Persons reporting "zero or negative" Total Income have been included in Table 3.1 but are excluded from Section 4, Income Profiles. Therefore regional and Manitoba totals for Income Distributions and Income Profiles do not agree.

Income distributions have also been prepared for Employment Income, Unemployment Insurance Benefits and Labour Force Income and are available upon request.

Income distributions have also been developed for persons 65 years of age and over. The distribution of Total Income for seniors is presented in Table 3.2. Income distributions are also available for Employment Income and Labour Force Income for the taxfilers 65 years and over.

Reference to a T1 tax return and a tax guide may prove useful in understanding these data.

Definitions:

The number of taxfilers	is the total number of persons filing income tax returns.
Total income	as reported to Revenue Canada on line 150 of the income tax return and as adjusted for tax purposes.
Employment income	is the sum of all sources of income associated with employment: T4 earnings, other employment income, professional, business, commission, fishing and farming.
Unemployment Insurance	income is all benefits reported for all reasons including retirement, maternity, sickness, fishing and occupational training as well as regular benefits.
Labour force income	is the sum of employment income and unemployment insurance benefits.

4.0 INCOME PROFILES

Income profiles have been developed from income tax records. Profiles are presented for Total Income, Employment Income and Unemployment Insurance Benefits. Geographical coding of the tax data is based on mailing addresses. Income profiles are also available for Labour Force Income upon request.

Persons reporting "zero or negative" incomes are excluded from this section but were included in Section 3, Income Distributions. Therefore regional and Manitoba totals for Income Distributions and Income Profiles do not agree.

Reference to a T1 tax return and the tax guide might prove helpful in understanding these data.

Definitions:

The number of taxfilers	is the total number of persons filing income tax returns.
Total income	(Table 4.1) as reported to Revenue Canada on line 150 of the income tax return and as adjusted for tax purposes.
Employment income	(Table 4.2) is the sum of all sources of income associated with employment: T4 earnings, other employment income, professional, business, commission, fishing and farming.
Unemployment Insurance	(Table 4.3) income is all benefits reported for all reasons including retirement, maternity, sickness, fishing and occupational training as well as regular benefits.
Unemployment Insurance Dependency Ratio	(Table 4.3) is the total amount of UI benefits divided by the total amount of employment income.
Labour force income	is the sum of employment income and unemployment insurance benefits.

5.0 ECONOMIC DEPENDENCY PROFILES

Economic Dependency Profiles have been developed from income tax records. Geographical coding of tax data is based on mailing addresses.

Definitions

Transfer Payments (Table 5.7) is the sum of family allowance, child tax credit, old age security, CPP/QPP, UI benefits and other pension benefits as reported to Revenue Canada/Taxation.

Economic Dependency Ratio (EDR) is total amount of transfer payments divided by the total amount of employment income.

Provincial Index is the region EDR as a percentage of the provincial EDR.

Canadian Index is the region EDR as a percentage of the Canadian EDR.

Unemployment Insurance Benefits (Table 5.1) is the total amount of unemployment insurance benefits reported in thousands of dollars.

Contribution to EDR is the total amount of unemployment insurance benefits divided by the total amount of employment income.

Family Allowance Benefits (Table 5.2) is the total amount of family allowance benefits reported in thousands of dollars.

Contribution to EDR is the total amount of family allowance benefits divided by the total amount of employment income.

Federal Sales Tax Credits (Table 5.3) is the amount of federal sales tax credits reported in thousands of dollars.

Contribution to EDR is the total amount of federal child tax credits divided by the total amount of employment income.

Child Tax Credit Benefits (Table 5.4) is the amount of child tax credits reported in thousands of dollars.

Contribution to EDR is the total amount of child tax credits divided by the total amount of employment income.

Old Age Security Benefits (Table 5.5) is the total amount of old age security benefits reported in thousands of dollars.

Contribution to EDR is the total amount of old age security benefits divided by the total amount of employment income.

CPP/QPP Benefits (Table 5.6) is the total amount of CPP/QPP benefits reported in thousands of dollars.

Contribution to EDR is the total amount of CPP/QPP benefits divided by the total amount of employment income.

Other Pension Benefits (Table 5.7) is the total amount of other pension benefits reported in thousands of dollars.

Contribution to EDR is the total amount of other pension benefits divided by the total amount of employment income.

6.0 UNEMPLOYMENT INSURANCE STATISTICS

The source of Unemployment Insurance Statistics is data from Employment and Immigration Canada.

Definitions

Total beneficiaries are the number of persons drawing $1.00 or more of unemployment insurance benefit for the Labour Force Survey reference week in a particular month.

Regular beneficiaries are the individuals collecting UI benefits who cannot find suitable employment, are available, and able to work and have met the following requirements:
- had an interruption of earnings; and
- had worked in insurable employment for at least 10 to 14 weeks in the last 52 weeks.

Other This category is composed of the following types of beneficiaries: sickness, maternity, retirement, fishing, training, work sharing and job creation.

8.0 MANITOBA ACTIVE STATISTICAL ESTABLISHMENTS

This section illustrates the number of "establishments" per industry group and employment size as reported in Statistics Canada's Business Register. Revenue Canada payroll deduction accounts are the base data source for the compilation of "establishments". The Manitoba Bureau of Statistics Postal Code Translator File was used to determine the regional breakdown of this data.

An "establishment" is defined as the smallest unit of a company (whether sole proprietorship, partnership, co-operative, corporation, etc.) that is a separate operating entity capable of reporting all elements of basic industrial statistics. Establishments are assigned to an industrial group by the 1970 and the 1980 Standard Industrial Classification. These SIC codes represented their major industrial activity.

The tables cover all industrial activity in Manitoba but are limited to the employer portion of the business world. Therefore, a business such as a corner store that is owner/operated, with no paid employees, would be excluded from these counts.

The Employment Size Codes give a range of employees only. Most are self-explanatory with the following exceptions:

0 - This size code indicates either:
(a) that a business had employees and currently does not, or,
(b) that the business does not currently have employees but expects to have employees within the next 12 months.

Unknown - This size code is assigned to businesses for which no information is available. Experience has shown that 90% of these businesses will have fewer than 20 employees.

9.0 FAMILY ALLOWANCE

Family Allowance data were obtained from Health and Welfare Canada's F55 program. The F55 program tallies the number of children by year and month of birth, by family size, by age and family size, and by age, for which Family Allowance is received. The F55 program is being used to produce statistics for school divisions, census divisions and economic regions. Data can be produced for any set of regions on the Manitoba Bureau of Statistics Postal Code Translator File.
